**100% of ‘Died Suddenly’
Autopsy Cases Causally
Connected to the COVID
Vaccine, According to Review**

Dr. Peter McCullough has been fighting the side effects of the COVID mRNA vaccines since the beginning. In this interview he elaborates on the sudden deaths in athletes and even during sleep.

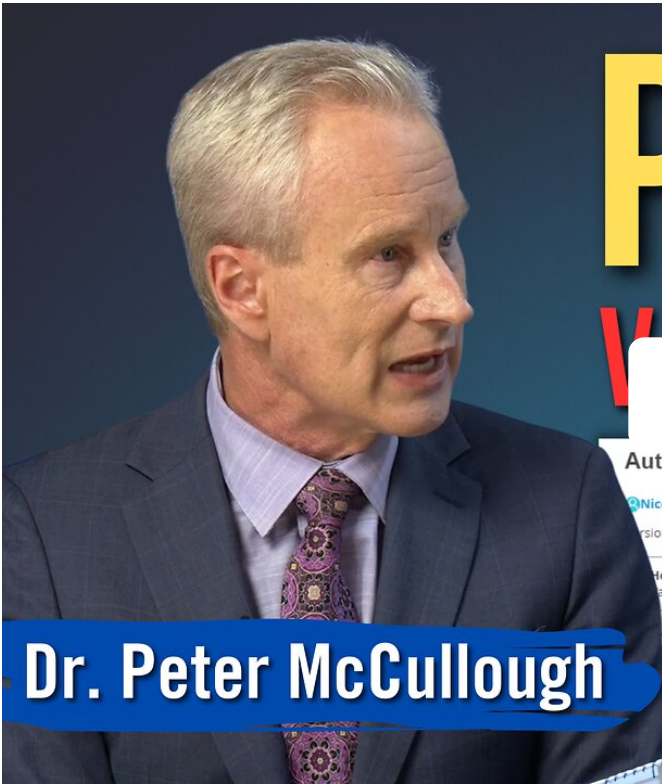

“We have now proof-positive in autopsies in cases like this: 100% of the time, it is fatal, vaccine-induced myocarditis.”

Abstract

Background: COVID-19 vaccines have been linked to myocarditis which in some cases has been fatal. This systematic review aims to investigate potential causal links between COVID-19 vaccines and myocarditis using post-mortem pathology.

Methods: We performed a systematic review of all published autopsy studies involving COVID-19 vaccination-related myocarditis through histopathology. Studies that include COVID-19 vaccine-induced myocarditis as a possible cause were included. No additional restrictions. Causality in each case was determined by three pathologists with extensive pathology experience and expertise. **Results:** We initially identified 1,691 studies and, after screening, included 14 papers that examined 38 autopsy cases. The pathological features were consistent with COVID-19 vaccine-induced myocarditis in all cases.
